Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/641,495

Applicant(s)

BRISCOE ET AL.

Examiner

LaShonda T Jacobs

Art Unit

2157

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 December 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-42 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-42 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Response to Amendment

This is Office Action in response to Applicants' response to Final Office Action. The Finality of the Application has been withdrawn. Claims 1-42 are presented for further examination.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chlan et al (hereinafter, "Chlan" U.S. Pat. No. 6,385,642) in view of Addante.

As per claim 1, Chlan discloses a system for obtaining enriched activity data in a client-server communications network wherein information requested by a network element is cached at one or more other network elements, comprising:

- a server network element including server software and a database for generating and storing a plurality of information files that are accessible to a requesting network element, the information files including text files and key words that are interpreted by the requesting network element to display the information requested.

However, Chlan does not explicitly disclose:

Art Unit: 2157

- single pixel GIF request is transmitted from the requesting element over the communications network to the server network element which reads and stores enriched data contained therein.

Addante discloses method and apparatus for transaction tracking over a computer network including:

- single pixel GIF request is transmitted from the requesting element over the communications network to the server network element which reads and stores enriched data contained therein (paragraphs 0037-0038).

Given the teaching of Addante, it would have been obvious to one of ordinary skill in art at the time the invention was made to modify Chlan by including a tag to request for invisible GIFs in order to monitor or track transactions by a user in a timely and efficient manner.

As per claims 17 and 32, Chlan discloses a method and computer readable medium for obtaining enriched activity data in a client-server communications network wherein information requested by a network element is cached at one or more other network elements, comprising the acts of:

- generating and storing a plurality of information files at a server network element that are accessible to a requesting network element, the information files including text files and key words (col. 3, lines 33-67, col. 5, lines 65-67, col. 6, lines 1-16, lines 53-67, col. 7, lines 1-6, lines 35-58, col. 11, lines 32-45 and col. 12, lines 1-32); and
- interpreting the information files including the text files and key words by the requesting network element to display the information requested (col. 3, lines 33-67,

Art Unit: 2157

col. 5, lines 65-67, col. 6, lines 1-16, lines 53-67, col. 7, lines 1-6, lines 35-58, col. 11, lines 32-45 and col. 12, lines 1-32).

However, Chlan does not explicitly disclose:

- single pixel GIF request is transmitted from the requesting element over the communications network to the server network element which reads and stores enriched data contained therein

Addante discloses method and apparatus for transaction tracking over a computer network including:

- single pixel GIF request is transmitted from the requesting element over the communications network to the server network element which reads and stores enriched data contained therein (paragraphs 0037-0038).

Given the teaching of Addante, it would have been obvious to one of ordinary skill in art at the time the invention was made to modify Chlan by including a tag to request for invisible GIFs in order to monitor or track transactions by a user in a timely and efficient manner.

As per claims 2 and 18, Chlan further discloses:

- one or more cache engines that are connected to at least one of the other network elements for temporarily storing requested information files that are served upon demand to the requesting network element (col. 3, lines 31-36 and col. 7, lines 1-16).

As per claims 3, 19 and 33, Chlan discloses the invention substantially as claims discussed above:

However, Chlan does not explicitly disclose:

Art Unit: 2157

- wherein the single pixel GIF request includes a Common Gateway Interface (CGI) query string appended to it that contains the enriched data.

Addante discloses method and apparatus for transaction tracking over a computer network including:

- wherein the single pixel GIF request includes a Common Gateway Interface (CGI) query string appended to it that contains the enriched data (paragraphs 0037-0038).

Given the teaching of Addante, it would have been obvious to one of ordinary skill in art at the time the invention was made to modify Chlan by including a tag to request for invisible GIFs in order to monitor or track transactions by a user in a timely and efficient manner.

As per claims **4, 20** and **34**, Chlan discloses:

- wherein the CGI query string includes an identification of the location of the requested information file (col. 5, lines 18-40, col. 7, lines 1-16, lines 64-67 and col. 8, lines 1-11).

As per claims **5, 21** and **35**, Chlan discloses:

- wherein the CGI query string includes a number of image objects contained in the information file (col. 5, lines 18-40, col. 7, lines 1-16, lines 64-67 and col. 8, lines 1-11).

As per claims **6, 22** and **36**, Chlan discloses:

- wherein the CGI query string includes an identification of a network element that referred the requesting network element to the server network element (col. 5, lines 18-40, col. 7, lines 1-16, lines 64-67 and col. 8, lines 1-11).

As per claims **7, 23** and **37**, Chlan discloses:

Art Unit: 2157

- wherein the CGI query string includes a persistent cookie identification of the requesting network element (col. 7, lines 1-16).

As per claims 8 and 24, Chlan discloses:

- wherein the client-server communications network is a global network such as the Internet (col. 3, lines 31-38).

As per claims 9, 25 and 38, Chlan discloses:

- wherein the plurality of information files are hypertext documents written with HyperText Markup Language (HTML) tags (col. 5, lines 25-30).

As per claims 10 and 26, Chlan discloses:

- wherein the hypertext documents contain source HTML code interpreted by the requesting element to generate the display of corresponding web pages stored at the server network element (col. 5, lines 25-40).

As per claim 11, Chlan discloses:

- wherein the server network element is a HyperText Transfer Protocol (HTTP) server (col. 1, lines 63-67).

As per claims 12 and 28, Chlan discloses:

- wherein the requesting network element is a client browser application (col. 5, lines 18-30).

As per claims 13, 29 and 40, Chlan discloses the invention substantially as claims discussed above:

However, Chlan does not explicitly disclose:

Art Unit: 2157

- wherein the single pixel GIF request with an appended Common Gateway Interface (CGI) query string is included as part of a JavaScript command that is put directly into the HTML file.

Addante discloses method and apparatus for transaction tracking over a computer network including:

- wherein the single pixel GIF request with an appended Common Gateway Interface (CGI) query string is included as part of a JavaScript command that is put directly into the HTML file (paragraphs 0037-0038).

Given the teaching of Addante, it would have been obvious to one of ordinary skill in art at the time the invention was made to modify Chlan by including a tag to request for invisible GIFs in order to monitor or track transactions by a user in a timely and efficient manner.

As per claims 14, 30 and 41, Chlan discloses:

- wherein the JavaScript command is a "document.write" command which places an expression that follows the command into a document window (col. 5, lines 25-40).

As per claims 15, 31 and 42, Chlan discloses:

- wherein the expression contains a HyperText Markup Language (HTML) image (IMG) tag with a source (SRC) attribute that specifies the Uniform Resource Locator (URL) location for the hypertext document (col. 5, lines 25-40).

As per claim 16, Chlan discloses:

- wherein the other network elements include any one or more of switch devices, router devices, gateways, and client computer devices (col. 3, lines 31-38).

As per claims 27 and 39, Chlan discloses:

- wherein hypertext documents are stored at a HyperText Transfer Protocol (HTTP) server (col. 1, lines 63-67).

Response to Arguments

3. Applicant's arguments with respect to claims 1-42 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
